Product In-Depth Description

We have highlighted some exceptional and unique features of our system. Using our system will create an experience you won't find in any other software. Also our system has many more useful modules and features, for that you can check our demo carefully.

Easy Installation: It requires no coding knowledge for your server installation. Plus, you are assisted by our team throughout the installation process.

Powerful Fees Management: You can maintain your institution's student fees in a very flexible way (Discount, Fine, Fee reminder).

Accept Payments: Our System accepts online/offline payments from your students.

Multiple Exam Systems: You can set three types of Exam (Mark, GPA, Mark & GPA). Multi type of mark distribution.

Office Accounting: Record Expenses & Income and Fee Collection can be automatically linked to Office accounts.

Custom Fields: You can add custom fields in student, employee, online admission form as per your requirement.

Progress Report Cards: The results of multiple term exams can be combined to make a progress card (with cumulative average, class average, subject position).

Role Permissions: Our system has 8 types of roles by default and you can add roles according to your needs and manage their permissions.

Schedule Email/SMS: You can send bulk sms or email to users and you can set the time and date schedule according to your needs.

Inventory Module: An inventory management module is a powerful tool that you can utilize to efficiently monitor, control, and optimize your inventory.

Card Management: With this module you can easily create your own template and use it to create Student ID Card, Admit Card, Certificate and Employee ID Card.

Library Management: Manage your day to day library.

Transport Management: Manage routes, buses, transports and students and their charges easily through our powerful transportation management system.

Hostel Management: Manage hostel room allocations, fees, students and day to day hostel and dormitory operations.

Calendar: Manage your digital calendar within our software.

Scheduling: Schedule classes, make routines, assign class teachers, manage leave for your staff and teachers and more.

Progressive Web-App: A progressive web app (PWA) is an app that's built using web platform technologies, but that provides a user experience like that of a platform-specific app.

Google Workspace as our Value Added Product

Academy Platforms is an official & authorized partner for Google for Education for Nepal (Checkout the article on partnership: <https://t.ly/fGLDh>). With this, Academy Platforms is proud to let its customers know that with the software, you get free Google Workspace for Education.

With Google Workspace, you can explore these features:

100TB of Storage for Your Organization: Secure Google Drive storage and can be used through all Google products & services.

Security and Administrative Tools in Google Admin Console: Customers registered with us get full administrative access to Google's Admin Console where they can manage their accounts and organization.

Google Classroom for Collaboration: Google Classroom has been a powerful tool for every classroom, it basically helps teachers and students bring their discussions, project works, and connectivity to a place. Now no need to use messaging apps for your school to deliver news, updates. Centralize all your needs with Google Classroom.

Premium Email for Your Organization: Use Google's email app separately configured for your school or college. Let your students and teachers for free have their email address connected to your organization. Because you are offering your students email from your school, they can unlock various discounts, sign up for various competitions for free and enroll themselves in many paid subscriptions for free.

High Quality Video Meetings: Secure video meetings and online classes. Attendance, assignment checker, classroom tools, secure file sharing and many more.

Free Website & Domain

We know the importance of websites & domains for all educational organizations and for this, we have started offering free website & domain names to educational organizations. This includes features such as:

Cloudflare CDN: We provide highly secure & reliable websites and domains to our customers. This is done by using Cloudflare CDN & various security tools including DDoS protected nameservers, BIMI & many more.

Wordpress: For letting IT professionals in schools & colleges to manage their websites easily, we provide websites built in wordpress, so they get it easy to make changes, post blogs & gallery.

Free Hosting: With free websites, we also mean free hosting & no extra charges for the service.

This was a small and simple report presented to you about how we can impact your educational institutions for good. Furthermore, we have tons of features and flexibility to offer to you.

To know about more of our features, please connect to us and our team will be happy to guide you on your requirements and expectations.

Sharing or distribution of this quotation outside your organization is strictly prohibited.
